

Real-time Condition-based Maintenance
for Adaptive Aircraft Maintenance Planning

Integrated Fleet Health Management solution aimed at replacing fixed-interval inspections with adaptive condition-based interventions

Hybrid data-driven & physics-based algorithms for systems

Data-driven probabilistic algorithms for structures

Open IT ecosystem

Partners

Technische Universiteit Delft / ATOS Spain / CEDRAT Technologies
Ecole Nationale Supérieure d'Arts et Métiers / Embraer Portugal SA
Instituto Pedro Nunes / KLM / ONERA / Optimal Structural Solutions
SMARTEC SA / UTRC Ireland / University of Coimbra / University of Patras

This project has received funding from the European
Union's Horizon 2020 research and innovation
programme under grant agreement No 769288
